MIT-WPU
Faculty of Engineering and Technology

End Course Survey

Programme Name	B.Tech (CSE-CSF)	**Academic Year**	2026-27
Course Name	Data Structures	**Class**	S. Y.
Course Code	CSF20020	**Semester**	III

Course Outcomes:

After completion of this course students will be able to:

1. To demonstrate the use of sequential data structures
2. To analyse different sorting algorithms so as to understand their applications
3. To develop skills for writing and analysing algorithms to solve domain problems.
4. To choose appropriate non-linear data structures to solve a given problem

Indirect Assessment: End Course Survey (To be filled by students)

Sr. No	Relevance to CO	Questions	Yes	Maybe	No
Section A: Course Learning Outcomes					
1	**CO1, CO4**	Are you able to understand the meaning of linear data structure & nonlinear data structures?	✓		
2		Are you able to select the appropriate data structure to solve problem?	✓		
3		Are you able to implement the concept of a sparse matrix?	✓		
4	**CO1, CO2, CO3,CO4**	Are you able to understand & use different types of searching techniques such as linear search, sentinel search and binary search?	✓		
5		Are you able to understand and implement bubble, selection, and insertion sort?	✓		
6		Are you able to compare bubble, selection, insertion, merge sort, quick sort, shell sort, bucket sort and radix sort and their complexity?	✓		
7		Are you able to Understand & select appropriate non-linear data structures to solve problems?	✓		
8	**CO1, CO3, CO4**	Do you understand two ways of organization: sequential and linked?	✓		
9		Are you able to implement stack and queue data structures using sequential organization?	✓		
10		Are you able to implement different types of Linked Lists using linked organization?	✓		

Section B: Course Design and Relevance					
1		The course developed my ability to write algorithms for solving domain-specific problems.	✓		
2		The course improved my ability to analyse algorithms in terms of their correctness and efficiency.	✓		
3		The course helped me select appropriate and efficient data structures for solving Computer Engineering problems.	✓		
Section C: Open-Ended Questions (Optional)					
1		What difficulties did you face while learning or implementing data structures and algorithms?			
2		What support would have helped you overcome them?			
3		What suggestions would you offer to improve the overall design, delivery relevance of this course?			

Student PRN Name and Signature (optional) – 1262250842, Saksham Jain Date: 29/10/2026
